- smart work using hard work.
- Ability to develop strong working relationships.
- Accuracy driven & convincing power.
- Client relationship management.
- Customer engagement and market research.

PROJECTS

MACHINE LEARNING-BASED FAKE PROFILE DETECTION ON SOCIAL NETWORKING WEBSITES

This project is about detection of fake profiles on social media using machine learning. It leverages two powerful machine learning algorithms, “The random forest classifier and Decision tree classifier “to accomplish the task. The social media platforms like Instagram, twitter, Facebook etc., has gained a significance importance they both as benefits and drawbacks as well as security risk. To reduce the risk of fake profiles this project is designed.

CERTIFICATION & REWARDS

1. International Journal of Scientific Research in Computer science, Engineering and Information Technology- **IJSRCSEIT**.
2. Python certification- HACKERRANK
